DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13, 15, 16 and 19-24 rejected under 35 U.S.C. 102(e) as being anticipated by Sekiyama.

The patent to Sekiyama discloses a route guidance device with a server 20 that has data storage for route guidance and landmark information via a wireless base station 14. The patent discloses voice guidance in column 1 lines 25-30 and column 2, line 65. As the device comes within range of a landmark the user given guidance for advertising purposes. The landmark is regarded as a decision point.

Claims 14, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

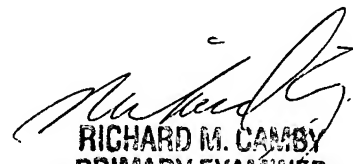

Claims 1-12 and 25-48 are allowed.
